ASTR 404/769 Final Exam 5/9/03

The final exam will be this Friday in rm 310 from 9-12pm. You can bring one side of a regular sheet of paper on which you can write any formula that you think would be helpful. I will also provide formulae and unit conversions on the test itself.

The goal of the final is to review the concepts presented in class. I do not test memorization skills. You can expect to find a combination of problems and short-answer conceptually-based questions. Some of these questions may be longer, requiring a more essay-style answer. The best way to study for the final is to review the lecture notes and all of the homework assignments.
